

CHERISH WATER BOOKLET

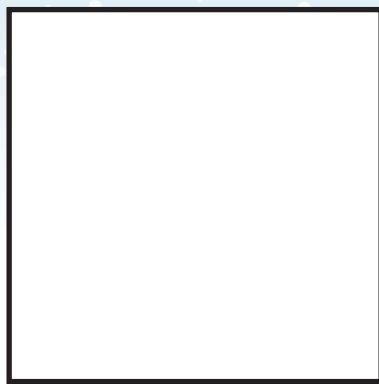

Name: _____

Class: _____

Do you know what ice turns into when it melts?

Please draw it in the square and write its name on the line.

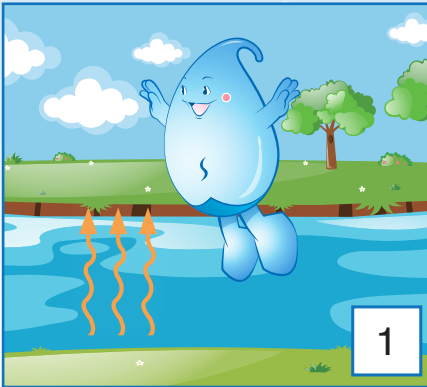

Ice

Due to climate change, glaciers are melting faster than ever, which will change the water cycle in ways that can affect people and the environment. Please fill in 2-4 in the box according to the sequence of the water cycle.

(1 is the process of evaporation, the start of the cycle.)

One effective solution to the problem of glacier melting is to reduce greenhouse gas emissions. Identify which way can reduce carbon emissions and circle the correct answer.

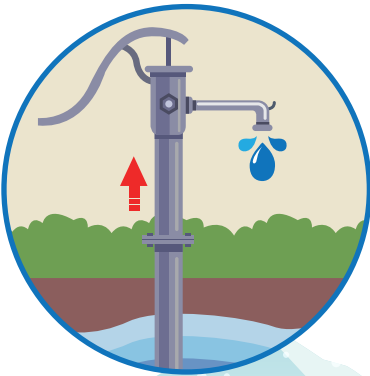

Cherish Water

Waste Water

Why does it take a lot of energy to transfer water?
Circle the correct answer,

Use pumps to transfer water from a low level to a high level

Use gravity flow to transfer water from a high level to a low level

In addition to reducing carbon emissions, we all need to develop a good habit of saving water. Please follow the water-saving behaviours, get out of the maze, and become a Cherish Water Star!

WATER DETECTIVE

Please observe and record one of your family member's water-using habits.

If he/she can do it, ✓ in the ☐.

Family Member: _____

Taking showers instead of baths.

☐

Turning off the tap while brushing teeth.

☐

Running washing machine with a full load.

☐

Washing vegetables and fruits in a container filled with water.

☐

Washing dishes in a container filled with water.

☐

Drinking up all the water filled.

☐

How many scores will you give him/her?
Colour the stars (5 stars are the highest).

Colour the picture and write your name.
Let's promise to be a Water-conscientious Kid.

I pledge to conserve water every day.

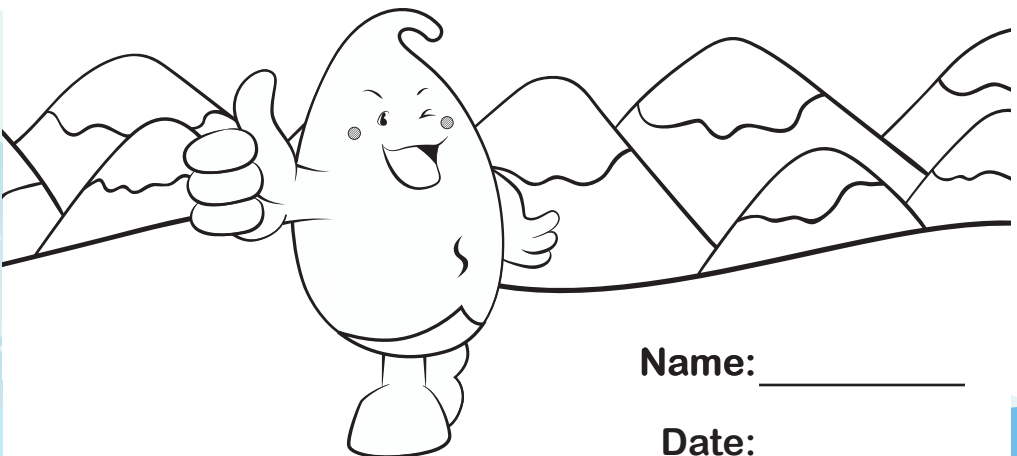

Use it wisely, not waste it away.

I will save every drop I can.

Here is my plan!

- ☐ Do not play with water.
- ☐ Take a shorter shower.
- ☐ Turn off the tap while brushing teeth.
- ☐ Tell family members if I see a water leak.
- ☐ Remind friends and family to save water.
