700+ : The no. of children under five years of age die every day from diarrhoea linked to unsafe water and poor sanitation

159 million: The no. of people collect their drinking water from surface water, such as ponds and streams

2.1 billion: The no. of people live without safe water at home

4 billion: The no. of people experience severe water scarcity during at least one month of the year

700 million: The no. of people worldwide could be displaced by intense water scarcity by 2030

Source: World Water Day official website

Hong Kong has continuous water supply from reservoirs and Dongjiang Water. Water scarcity is not an issue to us.

You are absolutely wrong!

In 1963, Hong Kong experienced a severe drought, the water stored in reservoir was only sufficient to provide for the public for 43 days. Therefore, water rationing was imposed in which water could only be supplied to public for 4 hours every 4 days. Nowadays, we can access safe drinking water easily by turning on the tap. When there are still many people believe that only developing countries are in the threat of water scarcity, actually water crisis is affecting us gradually, including Hong Kong, due to climate change, fast-growing population and high demand of water.

Saving A Little Goes A Long Way

Get Prepared For Water Crisis

If climate change worsened , HK with 'No Winter' is just around the corner

Rapid development in Guangdong cities drives the high demand for Dongjiang Water

A Staggering Fact: Hongkongers consume about 220L water per day per capita

Record-Breaking : The hottest third day of the Lunar New Year in HK
